Conclusion

- Need for LT to allow for multilingualism in Europe
- Language Technologies presently considered as any other scientific area, not as a political issue for the EU
 - Not all 23 languages are covered in terms of LT/LR
 - PR “At Least 21 European Languages in Danger of Digital Extinction”
 - Many generally short term / medium scale / national / stand alone / conflicting projects
 - No sustainable long term action
- ELRA as the counterpart of LDC
- No permanent entity comparable to NIST
 - CELCT, ELRA, LNE...
- Need for a shared effort between EC and MS on LT

Perspectives

- Distributed LRE European infrastructure
 - META-SHARE
 - Extend from distribution to col-laboration
 - Specification, Production, Annotation, Evaluation...
- International coordination on LRE
 - Avoid redundancy
 - Assign unique LR Identifier (LRID / ISLRN)
